INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF REPUBLIC BANK LIMITED AND ITS SUBSIDIARIES

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

ODINION

We have audited the financial statements of Republic Bank Limited and its subsidiaries ('the Group'), which comprise the Consolidated statement of financial position as at September 30, 2021, and the Consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and notes to the Consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying Consolidated financial statements present fairly, in all material respects, the financial position of the Group as at September 30, 2021, and financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards ('IFRSs').

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing ('ISAs'). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated financial statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' (IESBA) International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

RESPONSIBILITIES OF MANAGEMENT AND THE AUDIT COMMITTEE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of the Consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of Consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the Consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the Consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our Auditor's Report to the related disclosures in the Consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Auditor's Report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated financial statements, including the disclosures, and whether the Consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Consolidated financial statements.
 We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

CONSOLIDATED STATEMENT OF FINANCIAL POSITION

AS AT SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000)

	Notes	2021	2020

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000) EXCEPT WHERE OTHERWISE STATED

1 CORPORATE INFORMATION

Republic Bank Limited (the 'Bank'), a wholly owned subsidiary of Republic Financial Holdings Limited (RFHL) is incorporated in the Republic of Trinidad and Tobago and was continued under the provision of the Companies Act, 1995. Its registered office is located at Republic House, 9-17 Park Street, Port of Spain. RFHL is the ultimate Parent of the Group and is listed on the Trinidad and Tobago Stock Exchange.

The Bank has five subsidiaries and two associated companies. The Bank is engaged in a wide range of banking, financial and related activities in Trinidad and Tobago and Saint Lucia. A full listing of the Bank's subsidiary companies is detailed in Note 29, while associate companies are listed in Note 6.

2 SIGNIFICANT ACCOUNTING POLICIES

These Consolidated financial statements provide information on the accounting estimates and judgements made by the Group. These estimates and judgements are reviewed on an ongoing basis. The ongoing Novel Coronavirus (COVID-19) pandemic has increased the estimation uncertainty in the preparation of these Consolidated financial statements. The estimation uncertainty is associated with:

- the extent and duration of disruption to business as a result of actions from consumers, businesses and governments to contain the spread of the virus;
- the extent and duration of the expected economic downturn in the economies in which we operate. This includes forecasts for economic growth, unemployment, interest rates and inflation.

The Group has formed estimates based on information that was available on September 30, 2021, which was deemed to be reasonable in forming these estimates. The actual economic conditions may be different from the estimates used and this may result in differences between the accounting estimates applied and the actual results of the Group for future periods.

The principal accounting policies applied in the preparation of these Consolidated financial statements are set out below. These policies have been consistently applied across the Group.

Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current year. These changes were not material to the overall Consolidated financial statements and had no impact on net assets, profit for the year and retained earnings for the year ended September 30, 2021.

2.1 Basis of preparation

The Consolidated financial statements of the Group are prepared in accordance with International Financial Reporting Standards (IFRS), and are stated in Trinidad and Tobago dollars (TTD). These Consolidated financial statements have been prepared on a historical cost basis, except for the measurement of investment securities at fair value. The preparation of Consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions. Actual results could differ from those estimates. Significant accounting judgements and estimates in applying the Group's accounting policies have been described in Note 3.

2.2 Basis of consolidation

The Consolidated financial statements comprise the financial statements of Republic Bank Limited and its subsidiaries as at September 30 each year. The financial statements of subsidiaries are prepared for the same reporting year as the Parent company using consistent accounting policies.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intercompany balances and transactions, including unrealised profits arising from intragroup transactions have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered.

Subsidiaries are all entities over which the Group has the power to direct the relevant activities, have exposure or rights to the variable returns and the ability to use its power to affect the returns of the investee, generally accompanying a shareholding of more than 50% of the voting rights.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- · Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

FOR THE YEAR ENDED SEPTEMBER 30, 2021

EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Basis of consolidation (continued)

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases and any resultant gain or loss is recognised in the Consolidated statement of income. Any investment retained is recognised at fair value.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

2.3 Changes in accounting policies

The accounting policies adopted in the preparation of the Consolidated financial statements are consistent with those followed in the preparation of the Group's annual Consolidated financial statements for the year ended September 30, 2020, except for the adoption of new standards and interpretations below.

Several amendments and interpretations apply for the first time in 2021, but do not have any impact on the Consolidated financial statements of the Group. These are also described in more detail below. The Group has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

IFRS 3 Business Combinations – Amendments to IFRS 3 (effective January 1, 2020)

The International Accounting Standards Board (IASB) issued amendments to the definition of a business in IFRS 3 Business Combinations to help entities determine whether an acquired set of activities and assets is a business or not. They clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test.

The amendments must be applied to transactions that are either business combinations or asset acquisitions for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2020. Consequently, entities do not have to revisit such transactions that occurred in prior periods. Earlier application is permitted and must be disclosed.

Since the amendments apply prospectively to transactions or other events that occur on or after the date of first application, most entities will likely not be affected by these amendments on transition. However, entities considering the acquisition of a set of activities and assets after first applying the amendments should update their accounting policies in a timely manner.

The adoption and amendment to this standard had no impact on the Consolidated financial statements of the Group.

IFRS 7 Financial Instruments: Disclosures and IFRS 9 Financial Instruments Amendments (effective January 1, 2020)

The amendments to IFRS 9 Financial Instruments provide a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainty about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

The amendments must be applied retrospectively. However, any hedge relationships that have previously been de-designated cannot be reinstated upon application, nor can any hedge relationships be designated with the benefit of hindsight. Early application is permitted and must be disclosed.

The adoption and amendment to this standard had no impact on the Consolidated financial statements of the Group as it does not have any interest rate hedge relationships.

IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors Amendments (effective January 1, 2020)

The amendments provide a new definition of 'material' that states, 'information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity'

The amendments clarify that materiality will depend on the nature or magnitude of information, either individually or in combination with other information, in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

The amendments must be applied prospectively. Early adoption is permitted and must be disclosed.

Although the amendments to the definition of material is not expected to have a significant impact on an entity's financial statements, the introduction of the term 'obscuring information' in the definition could potentially impact how materiality judgements are made in practice, by elevating the importance of how information is communicated and organised in the financial statements.

The adoption and amendment to this standard had no impact on the Consolidated financial statements of the Group.

Conceptual Framework for Financial Reporting (effective January 1, 2020)

The revised Conceptual Framework for Financial Reporting is not a standard, and none of the concepts contained therein override the concepts or requirements in any standard. The purpose of the Conceptual Framework is to assist the IASB in developing standards, to help preparers develop consistent accounting policies where there is no applicable standard in place and to assist all parties to understand and interpret the standards. The revised Conceptual Framework includes some new concepts, provides updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts.

The adoption and amendment to this framework had no impact on the Consolidated financial statements of the Group.

IFRS 16 Leases – Amendments to IFRS 16 – COVID-19 Related Rent Concessions (effective June 1, 2020)

In May 2020, the IASB amended IFRS 16 Leases to provide relief to lessees from applying IFRS 16 guidance on lease modification to rent concessions arising as a direct consequence of the COVID-19 pandemic. The amendment does not apply to lessors.

As a practical expedient, a lessee may elect not to assess whether a COVID-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the COVID-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

The practical expedient applies only to rent concessions occurring as a direct consequence of the COVID-19 pandemic and only if all the following conditions are met:

- The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change
- Any reduction in lease payments affects only payments originally due on or before June 30, 2021 (for example, a rent concession would meet this condition if it results in reduced lease payments before June 30, 2021 and increased lease payments that extend beyond June 30, 2021)
- \cdot $\;$ There is no substantive change to other terms and conditions of the lease.

Lessees will apply the practical expedient retrospectively, recognising the cumulative effect of initially applying the amendment as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of the annual reporting period in which the amendment is first applied.

The adoption and amendment to this standard had no impact on the Consolidated financial statements of the Group.

2.4 Standards in issue not yet effective

The following is a list of standards and interpretations that are not yet effective up to the date of issuance of the Group's Consolidated financial statements. These standards and interpretations will be applicable to the Group at a future date and will be adopted when they become effective. The Group is currently assessing the impact of adopting these standards and interpretations.

Interest Rate Benchmark Reform – Phase 2 – Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (effective January 1, 2021)

The amendments provide temporary reliefs which address the financial reporting effects when an Interbank Offered Rate (IBOR) is replaced with an alternative nearly Risk-free interest Rate (RFR).

The amendments include a practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating rate, equivalent to a movement in a market rate of interest. Inherent in allowing the use of this practical expedient is the requirement that the transition from an IBOR benchmark rate to an RFR takes place on an economically equivalent basis with no value transfer having occurred.

The amendments are mandatory, with earlier application permitted. Hedging relationships must be reinstated if the hedging relationship was discontinued solely due to changes required by IBOR reform and it would not have been discontinued if the phase two amendments had been applied at that time. While application is retrospective, an entity is not required to restate prior periods.

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.4 Standards in issue not yet effective (continued)

IFRS 3 Business Combinations - Amendments to IFRS 3 (effective January 1, 2022)

The amendments are intended to replace a reference to a previous version of the IASB's Conceptual Framework (the 1989 Framework) with a reference to the current version issued in March 2018 (the Conceptual Framework) without significantly changing its requirements.

The amendments add an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets or International Financial Reporting Interpretations Committee (IFRIC) 21 Levies, if incurred separately. The exception requires entities to apply the criteria in IAS 37 or IFRIC 21, respectively, instead of the Conceptual Framework, to determine whether a present obligation exists at the acquisition date.

At the same time, the amendments add a new paragraph to IFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date.

The amendments must be applied prospectively. Earlier application is permitted if, at the same time or earlier, an entity also applies all of the amendments contained in the Amendments to References to the Conceptual Framework in IFRS Standards (March 2018)

The amendments are intended to update a reference to the Conceptual Framework without significantly changing requirements of IFRS 3. The amendments will promote consistency in financial reporting and avoid potential confusion from having more than one version of the Conceptual Framework in use.

IAS 16 Property, Plant and Equipment – Amendments to IAS 16 (effective January 1, 2022)

The amendment prohibits entities from deducting from the cost of an item of Property, Plant and Equipment (PP&E), any proceeds of the sale of items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The amendment must be applied retrospectively only to items of PP&E made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

IAS 37 Provisions, Contingent Liabilities and Contingent Assets – Amendments to IAS 37 (effective January 1, 2022)

The amendments apply a 'directly related cost approach'. The costs that relate directly to a contract to provide goods or services include both incremental costs (e.g. the costs of direct labour and materials) and an allocation of costs directly related to contract activities (e.g. depreciation of equipment used to fulfil the contract as well as costs of contract management and supervision). General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The amendments must be applied prospectively to contracts for which an entity has not yet fulfilled all of its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). Earlier application is permitted and must be disclosed.

The amendments are intended to provide clarity and help ensure consistent application of the standard. Entities that previously applied the incremental cost approach will see provisions increase to reflect the inclusion of costs related directly to contract activities, whilst entities that previously recognised contract loss provisions using the guidance from the former standard, IAS 11 Construction Contracts, will be required to exclude the allocation of indirect overheads from their provisions. Judgement will be required in determining which costs are 'directly related to contract activities', but we believe that guidance in IFRS 15 Revenue from Contracts with Customers will be relevant.

IAS 1 Presentation of Financial Statements – Amendments to IAS 1 (effective January 1, 2023)

The IASB issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

The amendments clarify:

- What is meant by a right to defer settlement
- · That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification

IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 – Amendments to IAS 1 (effective January 1, 2023)

In February 2021, the IASB issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

The amendments aim to help entities provide accounting policy disclosures that are more useful by:

- Replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and
- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

Replacement of the term 'significant' with 'material'

In the absence of a definition of the term 'significant' in IFRS, the IASB decided to replace it with 'material' in the context of disclosing accounting policy information. 'Material' is a defined term in IFRS and is widely understood by the users of financial statements, according to the IASB. In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and the nature of them.

IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors – Amendments to IAS 8 (effective January 1, 2023)

The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amended standard clarifies that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors. The previous definition of a change in accounting estimate specified that changes in accounting estimates may result from new information or new developments. Therefore, such changes are not corrections of errors. This aspect of the definition was retained by the IASB.

The amendments are intended to provide preparers of financial statements with greater clarity as to the definition of accounting estimates, particularly in terms of the difference between accounting estimates and accounting policies. Although the amendments are not expected to have a material impact on entities' financial statements, they should provide helpful guidance for entities in determining whether changes are to be treated as changes in estimates, changes in policies, or errors.

IAS 12 Income Taxes – Amendments to IAS 12 (effective January 1, 2023)

The amendments to IAS 12, narrows the scope of the initial recognition exception under IAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognised in the financial statements (and interest expense) or to the related asset component (and interest expense). This judgement is important in determining whether any temporary differences exist on initial recognition of the asset and liability.

Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal.

Nevertheless, it is possible that the resulting deferred tax assets and liabilities are not equal (e.g. if the entity is unable to benefit from the tax deductions or if different tax rates apply to the taxable and deductible temporary differences). In such cases, which the IASB expects to occur infrequently, an entity would need to account for the difference between the deferred tax asset and liability in profit or loss.

An entity should apply the amendments to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, at the beginning of the earliest comparative period presented, it should also recognise a deferred tax asset (provided that sufficient taxable profit is available) and a deferred tax liability for all deductible and taxable temporary differences associated with leases and decommissioning obligations.

FOR THE YEAR ENDED SEPTEMBER 30, 2021

EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.5 Improvements to International Financial Reporting Standards

The annual improvements process of the IASB deals with non-urgent but necessary clarifications and amendments to IFRS. The following amendments are applicable to annual periods beginning on or after January 1, 2021:

IFRS	SUBJECT OF AMENDMENT
IFRS 1 -	First-time Adoption of International Financial Reporting Standards -
	Subsidiary as a first-time adopter (effective January 1, 2022)
IFRS 9 -	Financial Instruments - Fees in the '10 percent' test for derecognition of
	financial liabilities (effective January 1, 2022)

2.6 Summary of significant accounting policies

a Cash and cash equivalents

For the purpose of presentation in the Consolidated statement of cash flows, cash and cash equivalents consist of highly liquid investments, cash at hand and at bank, Treasury Bills and bankers' acceptances with original maturities of three months or less.

b Statutory deposits with Central Banks

Deposits with the Central Bank of Trinidad and Tobago and other regulatory authorities represent the Group's regulatory requirement to maintain a percentage of deposit liabilities as cash, Treasury Bills and/or deposits with Central Bank. These funds are not available to finance the Group's day-to-day operations. Other than statutory deposits of \$4.4 billion (2020: \$4.1 billion), the Group holds Treasury Bills and other deposits of \$2.1 billion (2020: \$446 million) with the Central Bank of Trinidad and Tobago and \$534 million (2020: \$837 million) in United States Treasury Bills as at September 30, 2021. Interest earned on these balances for the year was \$13.6 million (2020: \$39.5 million).

c Financial instruments - initial recognition

i Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e. the date that the Group becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Group recognises balances due to customers when funds are transferred to the Group.

ii Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments, as described in Note 2.6 (d) (i). Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at Fair Value through Profit or Loss (FVPL), transaction costs are added to, or subtracted from this amount.

iii Measurement categories of financial assets and liabilities

The Group classifies all of its financial assets based on the business model for managing the assets and the assets' contractual terms, measured at either:

- Amortised cost, as explained in Note 2.6 (d) (i)
- · FVPL, as explained in Note 2.6 (d) (ii)

Financial liabilities, other than loan commitments and financial guarantees are measured at amortised cost.

d Financial assets and liabilities

i Due from banks, Treasury Bills, Advances and Investment securities

The Group only measures Due from banks, Treasury Bills, Advances to customers and Investment securities at amortised cost if both of the following conditions are met:

- The contractual terms of the financial asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding and
- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows.

The details of these conditions are outlined below.

The SPPI test

For the first step of its classification process, the Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

For the purpose of this test 'principal' is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (e.g. if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL or Fair Value through Other Comprehensive Income (FVOCI) without recycling.

Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward

ii Financial assets at fair value through profit or loss

Financial assets in this category are those that are designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management may designate an instrument at FVPL upon initial recognition.

The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or recognising gains or losses on them on a different basis.

Financial assets at FVPL are recorded in the Consolidated statement of financial position at fair value. Interest earned or incurred on instruments designated at FVPL is accrued in interest income, using the Effective Interest Rate (EIR), taking into account any discount or premium and qualifying transaction costs being an integral part of the instrument. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other income when the right to the payment has been established.

iii Undrawn Ioan commitments

Undrawn loan commitments and letters of credit are commitments under which, over the duration of the commitment, the Group is required to provide a loan with pre-specified terms to the customer. These contracts are in the scope of the Expected Credit Loss (ECL) requirements but no ECL was determined based on historical observation of defaults.

iv Debt securities and Other fund raising instruments

Financial liabilities issued by the Group that are designated at amortised cost, are classified as liabilities under Debt securities in issue and Other fund raising instruments, where the substance of the contractual arrangement results in the Group having an obligation to deliver cash to satisfy the obligation. After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issued funds, and costs that are an integral part of the EIR.

e Reclassification of financial assets and liabilities

The Group does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Group acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Summary of significant accounting policies (continued)

f Derecognition of financial assets and liabilities Derecognition due to substantial modification of terms and conditions

The Group derecognises a financial asset, such as a loan to a customer, to facilitate changes to the original loan agreement or arrangement due to weaknesses in the borrower's financial position and/or non-repayment of the debt as arranged and terms and conditions have been restructured to the extent that, substantially, it becomes a new loan, with the difference recognised as an impairment loss. The newly recognised loans are classified as Stage 2 for ECL measurement purposes.

When assessing whether or not to derecognise a loan to a customer, amongst others, the Group considers the following factors:

- · Change in currency of the loan
- · Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original rate (or credit adjusted EIR for purchased or credit impaired financial assets), the Group records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

Derecognition other than for substantial modification

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Group also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Group has transferred the financial asset if, and only if, either:

- The Group has transferred its contractual rights to receive cash flows from the financial asset or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'passthrough' arrangement.

Pass-through arrangements are transactions whereby the Group retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Group has no obligation to pay amounts to the eventual recipients unless it
 has collected equivalent amounts from the original asset, excluding short-term
 advances with the right to full recovery of the amount lent plus accrued interest at
 market rates
- The Group cannot sell or pledge the original asset other than as security to the eventual recipients
- The Group has to remit any cash flows it collects on behalf of the eventual recipients
 without material delay. In addition, the Group is not entitled to reinvest such cash
 flows, except for investments in cash or cash equivalents including interest earned,
 during the period between the collection date and the date of required remittance
 to the eventual recipients

A transfer only qualifies for derecognition if either:

- \cdot The Group has transferred substantially all the risks and rewards of the asset, or
- The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

The Group considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Group has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Group's continuing involvement, in which case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Group could be required to pay.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

g Impairment of financial assets

i Overview of the ECL principles

The Group records an allowance for ECLs for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The Group uses the general probability of default approach when calculating ECLs. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the Lifetime Expected Credit Loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' Expected Credit Loss (12mECL). The Group's policies for determining if there has been a significant increase in credit risk are set out in Note

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the size and nature of the underlying portfolio of financial instruments. The Group's policy for grouping financial assets measured on a collective basis is explained in Note 22.2.6.

Where the financial asset meets the definition of Purchased or Originated Credit-Impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Group classifies its loans and investments into Stage 1, Stage 2, Stage 3 and POCI, as described below:

Stage

When financial assets are first recognised and continue to perform in accordance with the contractual terms and conditions after initial recognition, the Group recognises an allowance based on 12mECLs. Stage 1 financial assets also include facilities where the credit risk has improved and the financial asset has been reclassified from Stage 2.

Stage 2

When financial assets have shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. Stage 2 financial assets also include facilities where the credit risk has improved and the financial assets has been reclassified from Stage 3.

Stage 3

Financial assets considered credit-impaired (as outlined in Note 22.2), the Group records an allowance for the LTECLs.

POCI

POCI assets are financial assets that are credit-impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the ECLs.

For financial assets for which the Group has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a partial derecognition of the financial asset.

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Summary of significant accounting policies (continued)

g Impairment of financial assets (continued)

ii The calculation of ECLs

The Group calculates ECLs based on the historical measure of cash shortfalls, discounted at the instrument's coupon rate. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- PD The Probability of Default is an estimate of the likelihood of default over a given period of time. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 22.2.4.
- EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Group considers among other factors the risk rating category and aging of the financial asset. Each of these is associated with different PDs, EADs and LGDs. When relevant, it also incorporates how defaulted loans and investments are expected to be recovered, including the value of collateral or the amount that might be received for selling the asset.

With the exception of credit cards and other revolving facilities, for which the treatment is separately set out, the maximum period for which the credit losses are determined is the contractual life of a financial instrument.

Impairment losses and recoveries are accounted for and disclosed separately.

The mechanics of the ECL method are summarised below:

Stage 1

The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD which are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

Stage 2

When a financial asset has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The LGDs are derived as explained under Stage 3 for financial assets and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

Stage 3

For financial assets considered credit-impaired (as defined in Note 22.2), the Group recognises the LTECLs for these financial assets. The method is similar to that for Stage 2 assets, with the PD set at 100%.

POCI

POCI assets are financial assets that are credit-impaired on initial recognition. The Group only recognises the cumulative changes in LTECLs since initial recognition, based on a probability-weighting of the four scenarios, discounted by the credit-adjusted EIR.

In most instances, LGDs are determined on an individual loan or investment basis, including discounting the expected cash flows at the original EIR. Stage 3 LGDs are grouped by similar types to provide percentage averages to be applied for Stage 1 and Stage 2 loans.

In limited circumstances within the Group, where portfolios were small and the products homogenous with minimal history of defaults, a simplified ECL approach was applied using historical loss rates and staged based on the sovereign rating of the residence of the loan.

iii Credit cards, overdrafts and other revolving facilities

The Group's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Group has the right to cancel and/or reduce the facilities. The Group limits its exposure on these revolving facilities to the outstanding balance for non-performing facilities. For Stage 1 and Stage 2 facilities, the Group calculates ECL on a percentage utilisation of the credit card and overdraft limit based on the Group's expectations of the customer behaviour, its likelihood of default and the Group's future risk mitigation procedures, which could include reducing or cancelling the facilities.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, as explained in Note 22.2.4, but emphasis is also given to qualitative factors such as changes in usage and repayment patterns.

The interest rate used to discount the ECLs for credit cards is based on the interest rate that is expected to be charged over the expected period of exposure to the facilities. This estimation takes into account that many facilities are repaid in full each month and are consequently charged no interest.

iv Treasury Bills, Statutory deposits with Central Bank and Due from banks Treasury Bills, Statutory deposits with Central Bank and Due from banks are short-term funds placed with the Central Bank of Trinidad and Tobago and correspondent banks.

v Financial guarantees, letters of credit and undrawn loan commitments The Group issues financial guarantees, letters of credit and loan commitments.

Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default.

vi Forward looking information

In its ECL models, the Group considers a broad range of Forward Looking Information (FLI) as economic inputs, such as:

- · Currency rates
- · GDP growth
- Unemployment rates
- · Industry risk
- Real estate price trends
- Commodity price inflation rates

Within the countries in which the Group operates, statistical correlation between the overall performance of the economies and historic loss trends were established and used to correlate macroeconomic expectations to adjustments within the ECL models.

The Group however recognised that the inputs and models used for calculating ECLs may not always capture all characteristics and expectations of the market at the date of the Consolidated financial statements. To reflect this, management adjustments or overlays are made by assessing the macroeconomic factors and applying judgements, when such differences are significantly material.

h Collateral valuation

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories and other non-financial assets. Collateral, unless repossessed, is not recorded on the Group's Consolidated statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed at inception and re-assessed on a periodic basis.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on independent valuations and other data provided by third parties.

i Collateral repossessed

The Group's policy is for a repossessed asset to be sold. Assets to be sold are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date, in line with the Group's policy.

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Summary of significant accounting policies (continued)

i Collateral repossessed (continued)

In its normal course of business, should the Group repossess properties or other assets in its retail portfolio, it sometimes engages external agents to assist in the sale of these assets to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the Consolidated statement of financial position.

j Write-offs

The Group's accounting policy is for financial assets to be written off either partially or in their entirety only when the Group has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to other income.

k Investment in associated companies

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investments in associates are accounted for under the equity method of accounting.

The investments in associates are initially recognised at cost and adjusted to recognise changes in the Group's share of net assets of the associate, less any impairment in value. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The Consolidated statement of income reflects the Group's net share of the results of operations of the associates. Any change in Other Comprehensive Income (OCI) of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate the Group recognises its share of any changes, when applicable, in the Consolidated statement of changes in equity.

The Group determines whether it is necessary to recognise an impairment loss on its investment in its associates. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the loss in the Consolidated statement of income.

l Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the entity and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its Incremental Borrowing Rate (IBR) at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term or a change in the lease payments (e.g. changes to future payments resulting from a change in rate used to determine such lease payments).

The Group applies the short-term lease recognition exemption to its short-term leases of property (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of IT equipment that are considered to be low-value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Group as a lesso

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the Consolidated statement of income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

m Premises and equipment

Premises and equipment are stated at cost less accumulated depreciation.

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Consolidated statement of income during the financial period in which they are incurred.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each Consolidated statement of financial position date. Prior to 2021, the Group computed depreciation using the declining balance method for computers, software, servers and other hardware etc. This was revisited in 2021 and the depreciation method was changed to the straight-line method. The change was accounted for as a change in accounting estimate in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors. Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the Consolidated statement of income

Leasehold improvements, leased equipment, motor vehicles and some other items of equipment (e.g. computers, software, servers, other hardware etc.) are depreciated on a straight-line basis over their estimated useful lives. Depreciation other than on leasehold improvements, leased equipment, motor vehicles and some items of equipment is computed on the declining balance method at rates expected to apportion the cost of the assets over their estimated useful lives.

Prior to October 1, 2020, the depreciation rates used were as follows:

Freehold and leasehold premises

Equipment, furniture and fittings

15% - 33.33%

Effective October 1, 2020, the Group revisited its depreciation method which resulted in a change from the declining balance method to the straight-line basis for equipment:

Equipment (computers, software, servers, other hardware etc.)

Straight-line 4 - 8 years

n Impairment of non-financial assets

Further disclosures relating to impairment of non-financial assets are also provided in the following notes:

- · Disclosures for significant assumptions Note 3
- Premises and equipment Note 7

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash-Generating Unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Summary of significant accounting policies (continued)

n Impairment of non-financial assets (continued)

In assessing value in use, the estimated future cash flows available to shareholders are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount.

o Employee benefits

i Pension obligations

The Group operates a number of defined benefit plans, the assets of which are held in separate trustee-administered funds. The pension plans are funded by payments from the relevant Group companies, taking account of the recommendations of independent qualified actuaries who carry out the full valuation of the Plans every three years. In Trinidad and Tobago (T&T), RBL took the actuary's advice regarding a pension holiday, effective January 1999.

Annually, the Group's independent actuaries conduct a valuation exercise to measure the effect of all employee benefit plans.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the Consolidated statement of financial position with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to the Consolidated statement of income in subsequent periods.

Past service costs are recognised in the Consolidated statement of income on the earlier of:

- a The date of the plan amendment or curtailment, and
- b The date that the Group recognises related restructuring costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation under 'operating expenses' in the Consolidated statement of income:

- a Service costs comprising current service costs, past service costs, gains and losses on curtailments and non-routine settlements
- b Net interest expense or income

The defined benefit plans mainly expose the Group to risks such as investment risk, interest rate risk and longevity risk.

The above accounting requirement in no way affects the pension plans which continue to be governed by the approved Trust Deed and Rules and remain under the full control of the appointed Trustees.

The full results of the valuation exercise are disclosed in Note 9 to these Consolidated financial statements.

ii Other post-retirement obligations

The Group provides post-retirement medical benefits to its retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the shortest period of service that an employee must complete up to the date the employee is first eligible to retire early in normal health, using a methodology similar to that for defined benefit pension plans. Independent qualified actuaries carry out a valuation of these obligations.

iii Profit sharing scheme

The Croup operates various employee profit sharing schemes at the subsidiary level, which are administered by Trustees in accordance with terms outlined in the Profit Sharing Scheme Rules. The profit share to be distributed to employees each year is based on a specific formula outlined in these Profit Sharing Scheme Rules. Employees of RBL have the option to receive their profit share allocation in cash (up to a maximum of 75% of the total entitlement) and receive the balance in ordinary shares of RFHL. The number of shares to be allocated is based on the

employees' total entitlement less the cash element, divided by the average price of the unallocated shares purchased by the Trustees. The Group accounts for the profit share, as an expense, through the Consolidated statement of income.

iv Share-based payments

Employees of the Group receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments (equity-settled transactions) of the Parent company RFHL.

p Taxation

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Consolidated financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the Consolidated statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised where it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Income tax payable on profits, based on the applicable tax law in each jurisdiction, is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

q Statutory reserves

Statutory reserves represent accumulated transfers from net profit after deduction of taxes in each year for the Group to a statutory reserve account until the balance on this reserve is not less than the paid-up capital. In T&T there is also a requirement to maintain statutory reserves of at least twenty times its deposit liabilities. These reserves are not available for distribution as dividends or any other form of appropriation. Statutory reserves amounted to \$1.3 billion (2020: \$1.2 billion).

r Fiduciary asset

The Group provides custody, trustee and investment management services to third parties. All related assets are held in a fiduciary capacity and are not included in these Consolidated financial statements as they are not the assets of the Group. These assets under administration at September 30, 2021 totaled \$38.6 billion (2020: \$36.8 billion).

s Foreign currency translation

The individual financial statements of each group entity is presented in the currency of the primary economic environment, in which the entity operates (its functional currency). The Consolidated financial statements are expressed in TTD, which is the functional currency of the Parent.

Monetary assets and liabilities of the Parent, which are denominated in foreign currencies are expressed in TTD at rates of exchange ruling on September 30. Non-monetary assets and liabilities denominated in foreign currencies are translated at historic rates. All revenue and expenditure transactions denominated in foreign currencies are translated at mid-exchange rates and the resulting profits and losses on exchange from these trading activities are dealt with in the Consolidated statement of income.

The assets and liabilities of subsidiary companies are translated into TTD at the midrates of exchange ruling at the Consolidated statement of financial position date and all resulting exchange differences are recognised in OCI. All revenue and expenditure transactions are translated at an average rate.

t Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Group has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements, has pricing latitude and is also exposed to credit risks.

The specific recognition criteria described below must also be met before revenue is recognised.

The EIR method

Interest income and expense is recorded using the EIR method for all financial instruments measured at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

FOR THE YEAR ENDED SEPTEMBER 30, 2021

EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.6 Summary of significant accounting policies (continued)

t Revenue recognition (continued)

The EIR method (continued)

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount/premium on acquisition, fees and costs that are an integral part of the EIR. The Group recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

Interest income and expense

The Group calculates interest income and expense by applying the EIR to the gross carrying amount of financial assets and liabilities other than credit-impaired assets. For POCI financial assets a credit-adjusted EIR is applied to the amortised cost of the financial asset.

Interest income on all trading assets and financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate in net trading income and net gains or losses on financial assets at FVPL, respectively.

Fee and commission income

Unless included in the effective interest calculation, fees and commissions are recognised on an accruals basis as the service is provided. Fees and commissions not integral to effective interest arising from negotiating, or participating in the negotiation of a transaction from a third party are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts. Asset management fees related to investment funds are recognised over the period the service is provided.

Credit card fees and commissions are recognised at an amount that reflects the consideration to which the Group expects to be entitled in exchange for providing the services. Credit card fees and commissions are therefore net of amounts paid as the expenses for the direct cost of satisfying the performance obligation is netted against the revenues received.

Dividends

Dividend income is recognised when the right to receive the payment is established.

u Fair value

The Group measures financial instruments at fair value at each Consolidated statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value, where fair values are disclosed, are shown in Note 24 to the Consolidated financial statements.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- i In the principal market for the asset or liability, or
- ii In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

All assets and liabilities for which fair value is measured or disclosed in the Consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1

Included in the Level 1 category are financial assets and liabilities that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level 2

Included in the Level 2 category are financial assets and liabilities that are measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions and for which pricing is obtained via pricing services, but where prices have not been determined in an active market. This includes financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Group's own models whereby the majority of assumptions are market observable.

Level 3

Included in the Level 3 category are financial assets and liabilities that are not quoted as there are no active markets to determine a price. These financial instruments are held at cost, being the fair value of the consideration paid for the acquisition of the investment, and are regularly assessed for impairment.

For assets and liabilities that are recognised in the Consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Where the Group's investments are not actively traded in organised financial markets, the fair value is determined using discounted cash flow analysis, which requires considerable judgement in interpreting market data and developing estimates. Accordingly, estimates contained herein are not necessarily indicative of the amounts that the Group could realise in a current market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair values. The fair value information for investments is based on information available to management as at the dates presented. Management is not aware of any factors that would significantly affect the estimated fair value amounts.

Investments classified as FVPL are actively traded in organised markets and fair value is determined by reference to the market price at year end or on the last trade date prior to year end.

Financial instruments where carrying value is equal to fair value: Due to their short-term maturity, the carrying value of certain financial instruments is assumed to approximate their fair values. These include cash and cash equivalents, investment interest receivable, customers' deposit accounts, other fund raising instruments, other assets and other liabilities.

Advances are net of specific and other provisions for impairment. The fair value of advances is based on a current yield curve appropriate for the remaining term to maturity

The fair value of the floating rate debt securities in issue is based on quoted market prices where available and where not available is based on a current yield curve appropriate for the remaining term to maturity. For balances due to banks, where the maturity period is less than one year, the fair value is assumed to equal carrying value. Where the maturity period is in excess of one year, these are primarily floating rate instruments, the interest rates of which reset with market rates, therefore the carrying values are assumed to equal fair values.

The fair value of fixed rate debt securities carried at amortised cost is estimated by comparing market interest rates when they were first recognised with current market rates offered for similar financial instruments. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using prevailing money market interest rates for facilities with similar credit risk and maturity.

v Customers' liabilities under acceptances, guarantees, indemnities and letters of credit

These represent the Group's potential liability, for which there are equal and offsetting claims against its customers in the event of a call on these commitments. These amounts are not recorded on the Group's Consolidated statement of financial position but are detailed in Note 28 (b) of these Consolidated financial statements.

w Equity reserves

The reserves recorded in equity on the Group's Consolidated statement of financial position include:

Stated capital - ordinary stated capital is classified within equity and is recognised at the fair value of the consideration received by the Group.

Capital reserves - used to record exchange differences arising from the translation of the net investment in foreign operations.

Statutory reserves that qualify for treatment as equity as discussed in Note 2.6 (q).

FOR THE YEAR ENDED SEPTEMBER 30, 2021

EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

3 SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES IN APPLYING THE GROUP'S ACCOUNTING POLICIES

The preparation of the Group's Consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Group's exposure to risks and uncertainties include:

- a Risk management Note 22
- b Capital management Note 23

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the Consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur

Impairment losses on financial assets - Note 4 and Note 5

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The estimation of the amount and timing of future cash flows and collateral values when determining impairment losses
- The Group's internal credit grading model, assigns grades for corporate facilities and this was the basis for grouping PDs
- The Group's criteria for assessing if there has been a significant increase in credit risk and if so, allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- \cdot $\;$ Development of ECL models, including the various formulae and the choice of inputs
- Determination of the existence of associations between macroeconomic scenarios and economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- · The inclusion of overlay adjustments based on judgement and future expectations

Other assumptions

Net pension asset/liability – Note 9

In conducting valuation exercises to measure the effect of all employee benefit plans throughout the Group, the Groups' independent actuaries use judgement and assumptions in determining discount rates, salary increases, NIS ceiling increases, pension increases and the rate of return on the assets of the Plans.

Deferred taxes – Note 10

In calculating the provision for deferred taxation, management uses judgement to determine the probability that future taxable profits will be available to facilitate utilisation of temporary tax differences which may arise.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the Consolidated financial statements:

Premises and equipment - Note 7

Management exercises judgement in determining whether costs incurred can accrue sufficient future economic benefits to the Group to enable the value to be treated as a capital expense. Further judgement is used upon annual review of the residual values and useful lives of all capital items to determine any necessary adjustments to carrying value.

Leases – Note 8

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control that affects its ability to exercise or not to exercise the option to renew or to terminate (e.g. construction of significant leasehold improvements or significant customisation of the leased asset).

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when they need to be adjusted to reflect the terms and conditions of the lease (e.g. when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific adjustments (such as the subsidiary's stand-alone credit rating, or to reflect the terms and conditions of the lease).

Assessment of control

Management uses judgement in performing a control assessment review on all mutual funds and retirement plans sponsored by the Group and its subsidiaries. This assessment revealed that the Group is unable to exercise power over the activities of the funds/plans and is therefore not deemed to be in control of any of the mutual funds and retirement plans.

e Restructured/Modified loans

Within the retail and credit card portfolios, management will in the normal course of business modify the terms and conditions of facilities in the case of difficulties by the borrower. These modifications rarely result in an impairment loss and if it does, it is not material.

The Group occasionally makes modifications to the original terms of large commercial and corporate loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. These modifications are made only when the Group believes the borrower is likely to meet the modified terms and conditions. Indicators of financial difficulties include defaults on covenants, overdue payments or significant concerns raised by the Credit Risk Department. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms.

Restructured loans are carefully monitored. Restructured large commercial and corporate loans are classified as Stage 2 and amounted to \$290.6 million as at September 30, 2021 (2020: \$102.4 million).

FOR THE YEAR ENDED SEPTEMBER 30, 2021

EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

4 ADVANCES (continued)

e Restructured/Modified loans (continued)

To support our customers from the impact of the pandemic, the banking subsidiaries in the Group offered a moratorium to customers in good standing, which included a postponement of monthly instalments, including the principal and interest for a period of one to six months beginning on the date of acceptance with interest continuing to accrue during the period of the moratorium. These loans amounted to \$1.6 billion as at September 30, 2021 (2020: \$7.9 billion). The financial impact of the moratorium did not result in substantial modification of the loans and as such derecognition was not applicable and no modification gain or loss was recognised.

For the financial year 2021, the Group revisited its depreciation method which resulted in a change from the declining balance method to the straight-line basis for some items of equipment (e.g. computers, software, servers, other hardware etc.). This change was accounted for as a change in accounting estimate in accordance with IAS 8. This change was applied effective October 1, 2020.

d Liability profile

The defined benefit obligation is allocated amongst the Plan's members as follows:

	Defined benefit pension plans %	Post-retirement medical benefits %
- Active members	52	16
- Deferred members	5	_
- Pensioners	43	84

The weighted duration of the defined benefit obligation was 14.8 years for the pension benefit and 1.8 years for the medical benefit.

29% of the defined benefit obligation for active members was conditional on future salary increases.

98% of the pension benefits and 75% of the medical benefits for active members were vested.

e Changes in the fair value of plan assets are as follows:

	Defined benefit pension plans		
	2021	2020	
Opening fair value of plan assets	3,915,528	3,889,991	
Interest income	211,889	210,532	
Return on plan assets, excluding interest income	282,259	(59,025)	
Contributions by employer	2,645	4,716	
Benefits paid	(128,518)	(128,837)	
Expense allowance	(1,833)	(1,849)	
Closing fair value of plan assets	4,281,970	3,915,528	
Actual return on plan assets	494,148	151,507	

f Plan asset allocation as at September 30:

	Defined benefit pension plan Fair value Alk

i Summary of principal actuarial assumptions as at September 30:

	%
4.50 2.40	2.50 - 5.50 5.50 2.40 5.75
,	% 90 - 6.50 4.50 2.40 5.75

Assumptions regarding future mortality are based on published mortality rates. The life expectancies underlying the value of the defined benefit obligation as at September 30 are as follows:

	Defined benef pension plan	
	2021	2020
Life expectancy at age 60 - 65 for current pensioner in years:		
- Male	21.8	21.8
- Female	26.1	26.0
Life expectancy at age 60 - 65 for current members age 40 in years:		
- Male	22.7	22.7
- Female	27.0	27.0
		etirement I benefits
	2021	2020
Life expectancy at age 60 - 65 for current pensioner in years:		
Life expectancy at age 60 - 65 for current pensioner in years: - Male	21.0	21.0
	21.0 25.1	21.0 25.1
- Male - Female		

j Sensitivity analysis

The calculations of the defined benefit and medical obligations are sensitive to the assumptions used. The following table summarises how these obligations as at September 30, would have changed as a result of a change in the assumptions used.

	Defined benefit pension plans		Post-retireme medical benefi	
	1% p.a. increase	1% p.a. decrease	1% p.a. increase	1% p.a. decrease
2021				
- Discount rate	(355,000)	450,000	(232)	240
- Future salary increases	163,000	(140,000)	-	-
- Future pension cost increases	287,000	(242,000)	-	-
- Medical cost increases	-	-	234	(231)
2020				
- Discount rate	(461,000)	595,000	(426)	443
- Future salary increases	233,000	(200,000)	-	-
- Future pension cost increases	291,000	(291,000)	-	-
- Medical cost increases	_	_	443	(426)

An increase of one year in the assumed life expectancies shown above would increase the defined benefit obligation at September 30, 2021 by \$101 million and the post-retirement medical benefit by \$0.032 million.

These sensitivities were calculated by re-calculating the defined benefit obligations using the revised assumptions.

k Funding

The Group meets the entire cost of funding the defined benefit pension plans. The funding requirements are based on regular actuarial valuations of the Plans made every three years and the assumptions used to determine the funding required may differ from those set out above. The Group expects to pay nil to the pension plans in the 2022 financial year.

The Group operates the post-retirement medical benefit plan as a self-insured arrangement administered by insurance brokers. The Group expects to pay \$3.7 million to the medical plan in the 2022 financial year.

21 RELATED PARTIES

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operating decisions. A number of banking transactions are entered into with related parties in the normal course of business. These transactions are both secured and unsecured and were carried out on commercial terms and conditions and at market rates.

22 RISK MANAGEMENT

22.1 General

The Group's prudent banking practices are founded on solid risk management. In an effort to keep apace with its dynamic environment, the Group has established a comprehensive framework for managing risks, which is continually evolving as the Group's business activities change in response to market, credit, product and other developments.

FOR THE YEAR ENDED SEPTEMBER 30, 2021

EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

22 RISK MANAGEMENT (continued)

22.1 General (continued)

The basic principles of risk management followed by the Group include:

- Managing risk within parameters approved by the Board of Directors and Executives;
- Assessing risk initially and then consistently monitoring those risks through their life cycle:
- Abiding by all applicable laws, regulations and governance standards in every country in which we do business:
- Applying high and consistent ethical standards to our relationships with all customers, employees and other stakeholders; and
- Undertaking activities in accordance with fundamental control standards. These controls include the disciplines of planning, monitoring, segregation, authorisation and approval, recording, safeguarding, reconciliation and valuation.

The Board of Directors has ultimate responsibility for the management of risk within the Group. Acting with authority delegated by the Board, the Credit, Audit, Asset/Liability Committee (ALCO) and Enterprise Risk Committee, review specific risk areas.

A Group Enterprise Risk Management unit headed by a Chief Risk Officer, has the overall responsibility for ensuring compliance with all risk management policies, procedures and limits

The Internal Audit function audits Risk Management processes throughout the Group by examining both the adequacy of the procedures and the Group's compliance with these procedures. Internal Audit discusses the results of all assessments with Management and reports its findings and recommendations to the Audit Committees of the Parent and respective subsidiaries.

The Group's activities are primarily related to the use of financial instruments. The Group accepts funds from customers and seeks to earn above average interest margins by investing in high quality assets such as government and corporate securities as well as equity investments and seeks to increase these margins by lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The main risks arising from the Group's financial instruments are credit risk, interest rate and market risk, liquidity risk, foreign currency risk and operational risk. The Group reviews and agrees policies for managing each of these risks as follows:

22.2 Credit risk

Credit risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The objective of the Group's credit risk management function is to maximise the Group's risk-adjusted rate of return by maintaining credit risk exposure within acceptable parameters. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long-term success of the Group.

The Group's credit risk management process operates on the basis of a hierarchy of discretionary authorities. A Board Credit Committee, chaired by the Chairman of the Board and including executive and non-executive directors, is in place, with the authority to exercise the powers of the Board on all risk management decisions.

The Risk Management unit is accountable for the general management and administration of the Group's credit portfolio, ensuring that lendings are made in accordance with current legislation, sound banking practice and in accordance with the applicable general policy of the Board of Directors. The Risk Management function is kept separate from and independent of the business development aspect of the operations.

The Group uses a risk rating system which groups commercial/corporate accounts and overdrafts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. Retail lending, mortgages and retail overdrafts are managed by product type. Preset risk management criteria is in place at all branches to facilitate decision-making for all categories of loans including credit cards. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend inform the credit decision and determines the intensity of the monitoring process.

The debt securities within the Group's investment security portfolio are exposed to credit risk and are managed by investment grading or country exposure with preset exposure limits as approved by the Board of Directors. The credit quality of each individual security is assessed based on the financial strength, reputation and market position of the issuing company and the ability of that company to service the debt.

The Group avoids exposure to undue concentrations of risk by placing limits on the amount of risk accepted from a number of borrowers engaged in similar business activities, or activities in the same geographic region or with similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Such risks are controlled and monitored on a

revolving basis and are subject to an annual or more frequent review. Limits on the level of credit risk by product, industry sector, client and geography are approved by the Board of Directors.

The Group's credit control processes emphasise early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding balance may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

22.2.1 Analysis of risk concentration

The Group's concentrations of risk are managed by client/counterparty, geographical region and industry sector. The table below shows the Group's maximum exposure to any client or counterparty before taking into account collateral or other credit enhancements.

	Gross maximu	Gross maximum exposure	
	2021	2020	
Statutory deposits with Central Bank	4,413,320	4,124,724	
Due from banks	5,234,620	7,267,631	
Treasury Bills	2,649,532	2,113,569	
Advances	27,905,116	26,437,722	
Investment securities	7,358,146	6,104,879	
Investment interest receivable	75,120	68,140	
Total	47,635,854	46,116,665	
Undrawn commitments	2,018,291	2,403,802	
Acceptances	1,231,914	1,422,405	
Guarantees and indemnities	25	25	
Letters of credit	255,053	262,062	
Total	3,505,283	4,088,294	
Total credit risk exposure	51,141,137	50,204,959	

Where financial instruments are recorded at fair value, the amounts shown represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

a Industry sectors

The following table shows the risk concentration by industry for the components of the Consolidated statement of financial position. Additional disclosures for credit quality and the maximum exposure for credit risk per categories based on the Group's internal credit rating system and year-end stage classification are further disclosed in Notes 4 (d) and 5 (c).

	2021	2020
Government and Central Government Bodies	11,450,871	9,816,575
Financial sector	8,001,922	9,584,758
Energy and mining	1,294,702	1,132,107
Agriculture	235,070	208,025
Electricity and water	1,130,679	1,241,941
Transport, storage and communication	582,785	568,409
Distribution	3,899,237	3,798,632
Real estate	2,696,342	2,926,236
Manufacturing	1,857,586	1,716,407
Construction	2,547,423	2,454,641
Hotel and restaurant	965,015	964,308
Personal	12,217,019	11,818,409
Other services	4,262,486	3,974,511
	51,141,137	50,204,959

Credit exposure with state-owned bodies have been categorised according to the service offered by the organisation rather than within 'Government and Central Government Bodies'.

22 RISK MANAGEMENT (continued)

22.2 Credit risk (continued)

22.2.1 Analysis of risk concentration (continued)

b Geographical sectors

The Group's maximum credit exposure, after taking account of credit loss provisions established but before taking into account any collateral held or other credit enhancements, can be analysed by the following geographical regions based on the country of domicile of its counterparties:

	2021	2020
Trinidad and Tobago	43,208,207	43,298,376
Barbados	1,253,496	1,113,477
Eastern Caribbean	233,488	123,581
Guyana	241,285	226,470
United States	2,595,681	2,456,897
Europe	1,789,514	1,428,953
Ghana	22,691	22,712
Suriname	241,516	274,933
Other Countries	1,555,259	1,259,560

51,141,137 50,204,959

22.2.2 Impairment assessment

Financial asset provisions are reviewed quarterly in accordance with established guidelines and recommended provisions arising out of this review are submitted to the Board for approval. Non-performing debts recommended for write-off are also reviewed annually and action taken in accordance with prescribed guidelines. The Group's impairment assessment and measurement approach is set out below.

22.2.3 Default and recovery

The Group considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in cases when the borrower becomes 90 days past due on its contractual payments.

As a part of a qualitative assessment of whether a customer is in default, the Group also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Group carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate.

It is the Group's policy to consider a financial instrument as 'recovered' and therefore re-classified out of Stage 3 when none of the default criteria have been present for at least six consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once recovered depends on the updated credit grade, at the time of the recovery.

22.2.4 The Group's internal rating and PD estimation process

Commercial and corporate lending and mortgages

The Group has an independent internal credit risk department. Risk ratings were selected as cohort for PD analyses. A vintage approach was applied looking at the movements of ratings over a period of time. Historical PDs were developed and using statistical correlation between macroeconomic trends and historical default rates, management applied overlays based on expectations. As previously mentioned, LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on an individual level including estimating the present value of future cash flows. EAD equals the loan balance outstanding plus accrued interest.

Retail lending and mortgages

Product types were selected as cohort for PD analyses for retail lending and retail mortgages. A vintage approach was applied looking at the number of defaults by segment over a period of time. Historical PDs were developed and using statistical correlation between macroeconomic trends and historical default rates, management applied overlays based on expectations. LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on both an individual and collective level. EAD equals the loan balance outstanding plus accrued interest.

Overdrafts and credit cards

Many corporate customers are extended overdraft facilities and the PDs developed for the corporate portfolio were therefore applied. LGDs for the corporate portfolio were also utilised for overdrafts. EADs were developed based on historical trends in utilisation of overdraft limits. ECL percentages for the retail portfolio were utilised for retail overdrafts. PDs for the credit card portfolio were developed using default percentages over a period of time. EADs were developed based on historical trends in utilisation of credit card limits and LGD percentage estimates were developed based on historical loss trends for a sample of credit card non-performing facilities.

Management judgmentally applied overlays as required as there was no noted correlation between macroeconomic trends and historical default rates.

Investment securities

PDs and LGDs for traded instruments were based on the global credit ratings assigned to the instrument or the country of sovereign exposures. PDs and LGDs for non traded instruments were based on one notch below the credit rating of the sovereign in which the instrument is issued or on company ratings where they existed. Management applied judgemental overlays on local debt instruments. EAD equals the amortised security balance plus accrued interest.

Treasury Bills and Due from banks

Treasury Bills, Statutory deposits with Central Banks and Due from banks are short-term funds placed with Central Banks and correspondent banks and the Group therefore considers the risk of default to be very low. These facilities are highly liquid and without restriction and based on management's review of the underlying instruments the ECL on these instruments were determined to be zero.

Financial guarantees, letters of credit and undrawn loan commitments

Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default. As a result, the Group considers the risk of default to be very low and the ECL on these instruments were determined to be zero.

22.2.5 Significant increase in credit risk

The Group continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition.

The Group also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset, such as moving a customer/facility to a watch list. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition.

When estimating ECLs on a collective basis for a group of similar assets (as set out in Note 22.2.6), the Group applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

22.2.6 Grouping financial assets measured on a collective basis

As explained in Note 2.6 (g) (i) dependent on the factors below, the Group calculates ECLs either on a collective or an individual basis.

Asset classes where the Group calculates ECL on an individual basis include:

- · All Stage 3 assets, regardless of the class of financial assets
- \cdot $\;$ The commercial and corporate lending and overdraft portfolio
- The mortgage portfolio
- · The retail lending portfolio
- · The credit card portfolio

Asset classes where the Group calculates ECL on a collective basis include:

- · The retail overdraft portfolio
- Subsidiaries with small, homogeneous retail portfolios
- Past due not yet relegated credit facilities

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

22 RISK MANAGEMENT (continued)
22.2 Credit risk (continued)

22.2.7 Analysis of gross carrying amount and corresponding ECLs are as follows:

Advances

	2021 %	2020 %
Stage 1	82.7	91.8
Stage 2	13.8	5.0
Stage 3	3.5	3.2
	100.0	100.0

In response to COVID-19, the Group undertook a review of its loan portfolios determining high risk sectors and the ECL for each. The review considered the macroeconomic outlook, customer credit quality, the type of collateral held, exposure at default and the effect of payment deferral options as at the reporting date.

The ECL methodology and definition of default remained consistent with prior periods. Calculation inputs, including FLI, together with the determination of the staging of exposures were however revised.

	c	ommercial and			_
	Retail lending	corporate lending	Mortgages	Overdrafts	Credit cards Total
Stage 1 2021					
Gross loans ECL	4,221,695 (85,577)	5,660,265 (43,825)	, , , , , , , , , , , , , , , , , , , ,	1,551,798 (12,862)	720,396 23,870,644 (14,432) (213,229)
	4,136,118	5,616,440	11,659,957	1,538,936	705,964 23,657,415
ECL as a % of gross loar	ns 2.0	0.8	0.5	0.8	2.0 0.9
2020 Gross loans ECL	4,598,012 (37,980)	6,141,525 (24,025)	12,190,585 (23,540)	1,385,760 (5,891)	756,298 25,072,180 (39,525) (130,961)
	4,560,032	6,117,500	12,167,045	1,379,869	716,773 24,941,219
ECL as a % of gross loar	ns 0.8	0.4	0.2	0.4	5.2 0.5

The increase in Stage 1 ECLs was driven by FLI which increased LGDs, reflective of a reduction in recovery estimates for the Group.

The increase in ECLs for Stage 1 and Stage 2 is reflective of the increased risk profile of the investment portfolio due to purchases made during the period.

22.3 Liquidity risk

Liquidity risk is defined as the risk that the Group either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost.

Liquidity management is therefore primarily designed to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, or to satisfy the demands of customers for additional borrowings. Liquidity management focuses on ensuring that the Group has sufficient funds to meet all of its obligations.

FOR THE YEAR ENDED SEPTEMBER 30, 2021 EXPRESSED IN THOUSANDS OF TRINIDAD AND TOBAGO DOLLARS (\$'000), EXCEPT WHERE OTHERWISE STATED

22 RISK MANAGEMENT (continued)

22.3 Liquidity risk (continued)

Three primary sources of funds are used to provide liquidity – retail deposits, wholesale deposits and the capital market. A substantial portion of the Group is funded with 'core deposits'. The Group maintains a core base of retail and wholesale funds, which can be drawn on to meet ongoing liquidity needs. The capital markets are accessed for medium to long-term funds as required, providing diverse funding sources to the Group. Facilities are also established with correspondent banks, which can provide additional liquidity as conditions demand

The ALCO sets targets for daily float, allowable liquid assets and funding diversification in line with system liquidity trends. While the primary asset used for short-term liquidity management is the Treasury Bill, the Group also holds significant investments in other Government securities, which can be used for liquidity support. The Group continually balances the need for short-term assets, which have lower yields, with the need for higher asset returns

22.3.1 Analysis of financial liabilities by remaining contractual maturities

The following table summarises the maturity profile of the Group's financial liabilities at September 30, based on contractual undiscounted repayment obligations, over the remaining life of those liabilities. These balances include interest to be paid over the remaining life of the liabilities and will therefore be greater than the carrying amounts on the Consolidated statement of financial position. Refer to Note 25 for a maturity analysis of assets and liabilities.

The Group expects that not all of the contingent liabilities or commitments will be drawn before expiry of the commitments.

22.4 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates and equity prices.

22.4.1 Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. The Group has an ALCO which reviews on a monthly basis the non-credit and non-operational risk. Asset and Liability management is a vital part of the risk management process of the Group. The mandate of the Committee is to approve strategies for the management of the non-credit risks of the Group, including interest rate, foreign exchange, liquidity and market risks.

The primary tools currently in use are gap analysis, interest rate sensitivity analysis and exposure limits for financial instruments. The limits are defined in terms of amount, term, issuer, depositor and country. The Group is committed to refining and defining these tools to be in line with international best practice.

Interest on financial instruments classified as floating is repriced at intervals of less than one year while interest on financial instruments classified as fixed is fixed until the maturity of the instrument.

An interest rate sensitivity analysis was performed to determine the impact on net profit of a reasonable possible change in the interest rates prevailing as at September 30, with all other variables held constant. The impact on net profit is the effect of changes in interest rates on the floating interest rates of financial assets and liabilities. This impact is illustrated on the following table:

			Impact on	net profit	
	Change in	Change in 2021		202	:0
	basis points	Increase	Decrease	Increase	Decrease
TTD Instruments	+/- 50	64,766	(64,766)	60,175	(60,175)
USD Instruments	+/- 50	9,363	(9,363)	10,898	(10,898)

22.4.2 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Group's exposure to the effects of fluctuations in foreign currency exchange rates arises mainly from its investments and overseas subsidiaries and associates. The Group's policy is to match the initial net foreign currency investment with funding in the same currency. The Group also monitors its foreign currency position for both overnight and intra-day transactions.

Changes in foreign exchange rates affect the Group's earnings and equity through differences on the re-translation of the net assets and related funding of overseas subsidiaries and associates, from the respective local currency to TTD. Gains or losses on foreign currency investment in subsidiary and associated undertakings are recognised in reserves. Gains or losses on related foreign currency funding are recognised in the Consolidated statement of income.

22 RISK MANAGEMENT (continued)

22.4 Market risk (continued)

22.4.2 Currency risk (continued)

The principal currencies of the Group's subsidiary and associated company investments are TTD and USD.

The tables below indicate the currencies to which the Group had significant exposure at September 30, on its non-trading monetary assets and liabilities and its forecast cash flows. The analysis also calculates the effect of a reasonably possible movement of each currency rate against the TTD, with all other variables held constant.

22.5 Operational risk

The growing sophistication of the financial industry has made the Group's operational risk profile more complex. Operational risk is inherent within all business activities and has the potential for financial or reputational loss arising from inadequate or failed internal controls, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud.

The Group recognises that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. The Group's operational risk department oversees this and where appropriate, risk is transferred by the placement of adequate insurance coverage.

The Group has developed contingency arrangements and established facilities to support operations in the event of disasters. Independent checks on operational risk issues are also undertaken by the internal audit function.

Managing cybersecurity related threats across the Group remains a major priority. As part of the Group's business strategy in reducing cyber risk exposure, cybersecurity is embedded in the design of technology and services prior to deployment. The Group's Enterprise Risk Management Committee is responsible for overseeing cybersecurity risks and maintaining cybersecurity risk appetite. Mechanisms are in place across the Group to predict, prevent, detect and respond against cyber threats and where appropriate, risk is transferred by the placement of adequate insurance coverage.

23 CAPITAL MANAGEMENT

The Group's policy is to diversify its sources of capital, to allocate capital within the Group efficiently and to maintain a prudent relationship between capital resources and the risk of its underlying business. Equity increased by \$962 million to \$6 billion during the year under review

Capital adequacy is monitored by each member of the Group, employing techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervisory Practice (the Basel Committee), as implemented by the Central Bank for supervisory purposes. In T&T, the Basel II Regulations were promulgated in May 2020. Under these regulations, the risk-based capital guidelines require a minimum ratio of core capital (Tier I) to risk-weighted assets of 6%, with a minimum total qualifying capital (Tier I plus Tier II) ratio of 10%. Tier I capital comprises mainly of shareholders' equity.

		2021 %	2020 %
Capital adequacy ratio:	Basel II	16.84	14.66

At September 30, 2021 the Parent exceeded the minimum level required for adequately capitalised financial institutions (2020: exceeded).

28 CONTINGENT LIABILITIES

a Litigation

As at September 30, 2021, there were certain tax and legal proceedings outstanding against the Group. No provision has been made as professional advice indicates that it is unlikely that any significant loss will arise or that it would be premature at this stage of the action to determine the eventuality.

b Customers' liability under acceptances, guarantees, indemnities and letters of credit

	2021	2020

30 STRUCTURED ENTITIES

The Group sponsors several structured entities which are not consolidated as the Group is not deemed to be in control of those entities. The Group considers itself to be sponsor of a structured entity when it facilitates the establishment of the structured entity. The Group may hold an interest in some of these entities.

These structured entities include Mutual Funds and Retirement Benefit Plans which are financed through the issue of units to investors in the funds. The Group generates fees from managing the assets of these funds on behalf of the third party investors. For the year ended September 30, 2021, the Group earned \$1.8 million (2020: \$27.7 million) in management fees from the retirement plans and \$98.0 million (2020: \$93.7 million) from the mutual funds.

The Group holds an interest of \$52.5 million in sponsored funds as at September 30, 2021 (2020: \$81.5 million). The maximum exposure to loss in these funds is the carrying value of the assets held by the Group. These values are all included in the Investment securities portfolio of the Group as at September 30, 2021.
